PROFESSIONAL SUMMARY

Backend-focused Software Engineer with experience building scalable, production-ready applications using Java (Spring Boot) and C#.NET. Skilled in designing RESTful APIs, working with relational databases, and deploying cloud-based solutions on Azure. Proven ability to improve system reliability, optimize CI/CD pipelines, and deliver secure, high-performance applications in agile environments.

WORK EXPERIENCE

Software Developer Co-op

September 2025 - May 2026

Ontario Public Service - Ministry of Public and Business Service Delivery

Toronto, ON

- Developed and enhanced full-stack web applications using C#, .NET, Razor Pages, HTML/CSS, and JavaScript, delivering 5+ production features used by three internal business teams.
- Investigated and resolved front-end and back-end defects by debugging application logic and APIs, improving system stability and reducing recurring user-reported issues.
- Implemented PyTest-based automated tests for API endpoints, increasing test coverage from 50% to 80%, validating request/response behavior and prompt templates used in a Retrieval-Augmented Generation (RAG) pipeline.
- Built and maintained CI/CD pipelines in Azure DevOps, automating build, test, and deployment workflows and reducing deployment time from 2–3 hours to under 15 minutes.

PROJECTS

RememberBirthdays – Full-stack birthday manager with secure auth and automated email reminders.

[Backend](#) | [Frontend](#) | [Live](#) | [PDF](#) | [Video](#) Java (Spring Boot), Keycloak, PostgreSQL, Docker, React, TypeScript

- Built scalable RESTful microservices and full-stack APIs with Java 21, Spring Boot, and Hibernate, supporting CRUD operations and secure OAuth2 authentication with Keycloak and Spring Security.
- Integrated PostgreSQL for production-grade persistence, automated email reminders via SendGrid, and containerized services with Docker in a layered backend architecture.

UFC Store – MERN e-commerce platform with authentication and Stripe payments

[GitHub](#) | [Live](#)

React, JavaScript, Node.js, Express, MongoDB

- Built full-stack e-commerce features including JWT-based authentication, admin-restricted product CRUD, and dynamic shopping cart functionality.
- Integrated the Stripe API for secure payment processing and developed RESTful APIs using the MERN stack.

SKILLS

Programming

Java, C#, Python, Javascript/Typescript

Backend

Spring Boot, .Net, Node.js, Express.js

Frontend

React.js, HTML, CSS, Bootstrap, Material UI

Database

PostgreSQL, MySQL, MongoDB, Oracle SQL, MS SQL

Cloud and Devops

Git, Docker, Azure DevOps

Authentication & Authorization

Keycloak, OAuth2, JWT

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)	May 2026
Microsoft Certified: Azure Fundamentals (AZ-900)	September 2025
ISTQB (International Software Testing Qualifications Board) Foundation Level	April 2025

EDUCATION

Computer Programming Diploma, Seneca Polytechnic, GPA 3.9/4.0	2024 - 2026
Bachelor of Business (Accounting and Finance), La Trobe University, WAM 85%	2018 - 2021
